Contact

People are a company's most valuable capital, so investing in your staff's qualification is the sensible thing to do. In STAHL CraneSystems you have a competent partner at your side. You can rely absolutely on our many years of expertise and our practical approach.

For the knowledge you gain from us comes directly from a manufacturer of hoist technology and crane components. We communicate practical and theoretical knowledge which will stand you in good stead in your day-to-day work. The seminars described here cover all main product groups. However we would also be pleased to base a special programme on your individual specifications and requirements. The training courses can be booked as separate modules or form part of long-term continuing training. A certificate is awarded on completing the seminar.

We look forward to welcoming you!

## Support

STAHL CraneSystems can look back on more than 130 years of history. The constant drive for innovation, significant modernisations and receptivity to new aspects are the impetus for our continued development. We have always played a decisive role in drawing up general safety regulations in the field of hoist and crane technology.

Quality right down to the most minor detail is the standard to which we are committed. Not only as regards crane technology, but as regards customer support too. You will find hoist and crane technology from STAHL CraneSystems all over the world. Developed by engineers and experts, manufactured with the utmost diligence.

When it comes to sales, we are committed exclusively to capable, professional crane manufacturing partners. You can expect optimum support from them when your individual crane system with components from STAHL CraneSystems is at stake. Consulting and erection of a new system, system-oriented testing and maintenance, modernisation, spare parts supply and training courses. Working together with our subsidiaries and crane manufacturing partners we offer you perfectly coordinated support all over the world.

### **Training courses**

Our regional crane manufacturing partners are regularly brought up to date with training courses, seminars and information material. You too can profit directly from our expertise. We communicate practical and theoretical knowledge in our own training centre or on your premises. The seminars on offer in the form of single-subject, basic and advanced courses cover all main product groups. However we would also be pleased to match a special programme to your individual specifications and requirements.

### **Original spare parts**

Our own subsidiaries and numerous partners all around the world ensure reliable spare parts supply and professional assistance on the spot. Even decades after a series has been discontinued we guarantee world-wide prompt original spare parts service right around the clock.

### **Factory service centre – in action all over the world**

Our factory service centre is a service for our customers: wherever you are we assist your crane or systems manufacturer on site with our experience and expertise whenever he needs us. Up-to-date diagnostic apparatus and condition monitoring systems stand by to support professional service and maintenance work. Not only you, but your system, are in safe hands. You can rely on us.

# The seminars offered

## Product seminars

---

### Chain hoist

- Aimed at: service and maintenance staff
- Course content: instruction on chain hoists and their components, in particular structure, testing in accordance with accident prevention regulations, service and maintenance.

### Wire rope hoist

- Aimed at: service and maintenance staff
- Content: instruction on wire rope hoists and their components, in particular structure, testing in accordance with accident prevention regulations, service and maintenance.

### Combined wire rope and chain hoist seminar

- Aimed at: service and maintenance staff
- Course content: instruction on chain and wire rope hoists and their components, in particular structure, testing in accordance with accident prevention regulations, service and maintenance.

### → We recommend

Stay on the ball! If it has been more than three years since you visited one of our seminars, we recommend refreshing your knowledge. Then you can be sure that you are always right up to date.

## Specialised seminars

---

### Ground conveyors including fork-lift truck licence

- Aimed at: logistics and maintenance staff
- Course content: accident prevention regulations, operating ground conveyors, in particular fork-lift trucks, correctly, and attaching loads safely.

### Crane operator

- Aimed at: logistics and maintenance staff
- Course content: accident prevention regulations, operating cranes correctly and attaching loads safely.
- As an option, crane licence or crane operator licence included.

## Individual customer seminars

---

- Seminars can also be held on our partners' or customers' premises. Course content and costs to be agreed individually.

# Chain hoist

Well trained specialist staff is the foundation for a high standard of safety in day-to-day work and a prerequisite for the operational availability of your crane system. If a chain hoist should fail, profound understanding of the hoist is necessary to be able to diagnose the fault reliably. The seminar provides instruction on technology, testing, servicing and maintenance of chain hoists with components from STAHL CraneSystems.

## Course content

- Safety information on erection, service and maintenance of materials handling components
- Theoretical instruction on our chain hoists
- Practical work: maintenance and repairs on chain hoists
- Travel motors: inspection and maintenance
- Chains: construction, selection, care and replacement state of wear
- Crane tests

## Learning target

After taking part in this seminar you are able to carry out tests, servicing and maintenance work on our chain hoists and their travel motors.

## Participants

In-house maintenance staff. The requirement for participation is completed vocational training in mechanics or electrics. The number of participants is limited to eight as small groups result in greater learning success.

## Venue

Training centre, Künzelsau plant,  
or on customer's premises

## Date

Dates on request or at:  
<http://stahlcranes.com/de/support/kundenseminare.php>

## What we provide

- 1.5-day specialist seminar
- Midday meal and refreshments
- One evening meal as a group

# Wire rope hoist

Well trained specialist staff is the foundation for a high standard of safety in day-to-day work and a prerequisite for the operational availability of your crane system. If a wire rope hoist should fail, profound understanding of the hoist is necessary to be able to diagnose the fault reliably. The seminar provides instruction on technology, testing, servicing and maintenance of wire rope hoists with components from STAHL CraneSystems.

## Course content

- Safety information on erection, service and maintenance of materials handling components
- Theoretical instruction on our wire rope hoists
- Practical work: maintenance and repairs on wire rope hoists
- SLE and SMC overload devices: structure and functioning
- Travel motors: inspection and maintenance
- Wire ropes: construction, selection, care and replacement state of wear
- Crane tests

## Learning target

After taking part in this seminar you are able to carry out tests, servicing and maintenance work on our wire rope hoists and their travel motors.

## Participants

In-house maintenance staff. The requirement for participation is completed vocational training in mechanics or electrics. The number of participants is limited to eight as small groups result in greater learning success.

# Wire rope and chain hoist

Well trained specialist staff is the foundation for a high standard of safety in day-to-day work and a prerequisite for the operational availability of your crane system. If a wire rope or chain hoist should fail, profound understanding of the hoist is necessary to be able to diagnose the fault reliably. The seminar provides instruction on technology, testing, servicing and maintenance of wire rope and chain hoists with components from STAHL CraneSystems.

## Course content

- Safety information on erection, service and maintenance of materials handling components
- Theoretical instruction on our wire rope hoists
- Practical work: maintenance and repairs on wire rope hoists
- Theoretical instruction on our chain hoists
- Practical work: maintenance and repairs on chain hoists
- Travel motors: inspection and maintenance
- Chains and wire ropes: construction, selection, care and replacement state of wear
- Crane tests

## Learning target

After taking part in this seminar you are able to carry out tests, servicing and maintenance work on our chain and wire rope hoists and their travel motors.

## Participants

In-house maintenance staff. The requirement for participation is completed vocational training in mechanics or electrics. The number of participants is limited to eight as small groups result in greater learning success.

## Ort

Training centre, Künzelsau plant, or on customer's premises

## Termin

Dates on request or at:

<http://stahlcranes.com/de/support/kundenseminare.php>

## What we provide

- 2.5-day specialist seminar
- Midday meals and refreshments
- One evening meal as a group

# Ground conveyors

Comprehensive instruction and training of specialised staff is the foundation for the safe operation of ground conveyors. This includes communicating theoretical knowledge as well as practical driving exercises and examples. The participants learn to operate fork-lift trucks and other equipment correctly and to observe the relevant regulations.

## Course content

- Legal basis and responsibility
- Basic physical principles
- Accessory equipment, machine guards
- Driving and transporting loads
- Off-standard applications (passengers, use with working platforms, use in traffic)
- Loading and unloading vehicles
- Regular inspection
- Personal protective equipment
- Stopping fork-lift trucks
- Fork-lift truck licence
- Theoretical and practical test
- Concluding discussion

## Learning target

This seminar communicates specialised knowledge for ground conveyor operators as specified by regulations BGV D27, BGG 925 and BGV A1 issued by the Employers' Liability Insurance Associations. Participants are then able to perform the required tasks correctly and thus safely. On successful completion, the participants are granted a special ground conveyor operator licence.

## Participants

Staff assigned to operating ground conveyors.

Requirement is a medical examination on the basis of the guidelines issued by the Employers' Liability Insurance Associations (G25).

## Venue

On customer's premises

## Date

Dates on request

## What we provide

- 1-day specialised seminar (theory)
- Practical seminar on ground conveyors on request

# Crane operator

Well trained specialist staff is the foundation for the reliable functioning and long service life of your crane systems. This is a prerequisite for safety, which is ensured by operating them correctly and observing regulations. The participant learns to operate the crane independently and apply the safety regulations.

## Course content

- Introduction
- Crane regulations
- Requirements for crane operator
- Accident prevention regulations for cranes in acc. with BGV D6
- Load suspension equipment in hoist operation in acc. with BGR 500 (VGB 9a)
- Duties of crane operators
- Personal protective equipment
- Basic physical principles
- Regulations for sling and load suspension equipment
- Electrical equipment
- Concluding theoretical and practical test
- Closing discussion

## Learning target

This seminar communicates specialised knowledge for crane operators as specified by the accident prevention regulations BGV D6, BGG 921 and BGV A1 issued by the Employers' Liability Insurance Associations. On successful completion, the participants are granted a special crane operator licence.

Please note that our seminar only covers ground-operated cranes.

## Participants

Staff assigned to operating cranes. Requirement is a medical examination on the basis of the guidelines issued by the Employers' Liability Insurance Associations (G25).

## Venue

On customer's premises

## Date

Dates on request

## What we provide

- 1-day specialised seminar

# Organisation

## We'll bring you up to date.

Comprehensive knowledge of the individual products from STAHL CraneSystems and their use is a prerequisite for handling equipment correctly and to the operating company's satisfaction. We communicate specialist knowledge for the correct use, monitoring and care of your system. Our instructors guarantee professional, practice-oriented and effective training.

## The advantages of our seminars in the Künzelsau plant

- Media-assisted classrooms
- Communication media
- Original products
- Demonstration models
- Selected additional literature
- Information exchange
- Tour of the plant

# Organisation

## Registration

Registration for the seminars must always be in writing at the latest three weeks before the seminar begins. Please appreciate that telephone registration is only a provisional reservation. After receipt of your written registration STAHL CraneSystems will send firm confirmation of your participation.

## Cancellations

A seminar must always be cancelled in writing. If written cancellation is received up to 10 days before the seminar begins we will charge a handling fee of 100 Euro. If the cancellation is not received in due time or the participant does not appear on the specified date the full seminar fee will be invoiced.

## Seminar fees

The fees for the individual seminars are available on request (see Contact). The seminar fee will be invoiced immediately after conclusion of the seminar. Please settle the invoice without delay and strictly net. Our General Terms of Delivery apply. Seminar fees in our training centre include snacks, refreshments, midday meals, and depending on the individual seminar one evening meal and a certificate of completion. In addition we will charge mileage for the instructor's travel and overnight expenses if the seminar should take place on the customer's premises.

## How to find us

Our headquarters is in the town of Künzelsau in the Hohenlohe region of South Germany. You can reach us on the A6/E50 motorway from Heilbronn or Nürnberg. Exit the motorway at Junction 42 (Kupferzell) and follow the B19 to Künzelsau. Our plant is on the outskirts of town. Drive through Künzelsau in the direction of Morsbach, "Fachhochschule". Approx. 500 m beyond the sign denoting the town limits turn left to Hofratsmühle. You will shortly see STAHL CraneSystems on the right. We look forward to your visit!
